

# Lab 3

Total points 5/5

The respondent's email (**farees.siddiqui@ontariotechu.net**) was recorded on submission of this form.

✓ How to set gradients to zero?

1/1

☒ call optimizer.zero\_grad()

☐ call optimizer.step()

☐ call loss.backward()

✓ What activation function is used in the lab?

1/1

☐ softmax

☒ sigmoid

☐ relu

✓ How do you create a pytorch module parameter?

1/1

☒ use torch.nn.Parameter

☐ use torch.nn.Sigmoid

☐ use torch.nn.Module

✓ What is the data type of module parameters used in the lab?

1/1

☐ 64-bit float

☒ 32-bit float

☐ integer

✓ What kind of loss function used in the lab?

1/1

☒ binary cross entropy

☐ mean squared error
